

EO – AISI 316L STAINLESS STEEL TAPS

Taps for pure fluids built entirely in certified AISI 316L stainless steel.

Only TIG welding is used, to improve the robustness of the product and avoid any contamination of the dispensed fluid.

The head-valve, with fixed-rod, is made entirely of AISI 316L stainless steel with a PTFE seal that guarantees high-precision adjustment.

All items are supplied with external polish.

Handles made of polypropylene, acid-resistant material.

Handles colouring according to EN 13792.

Threads according to ISO 228/1, tolerance class B.

Maximum operating pressure 7 bar.

Standard supply		
Removable nozzle		For any modification, on request
Head-valve in AISI 316L stainless steel with PTFE seal
